OVERVIEW

Dr. Amir K. Jaffer and Dr. Franklin A. Michota, Jr., the founding Summit Directors, in collaboration with Dr. Darin J. Correll, will direct the upcoming 7th Annual Perioperative Medicine Summit in Miami, Florida. The course is co-sponsored by the University of Miami Miller School of Medicine and the Cleveland Clinic in collaboration with the **Society for Perioperative Assessment and Quality Improvement (SPAQI)**.

The goal of the Summit is to enable clinicians who are actively engaged in perioperative medical care to incorporate the latest findings from clinical research and recommendations from evidence-based guidelines into their practices so that they can improve the quality and safety of their medical care.

Evidence-based lectures will be supplemented by clinical cases and an Audience Response System will be used for exchange of information among faculty and attendees. A dedicated 15-minute Q&A session after each presentation has been a highlight of this Summit. In addition, clinical and lab research, innovations and clinical vignettes related to perioperative medicine will be selected for presentation.

New this year:

- **Meet the Professor with national experts**
- **One-Minute Perioperative Consults**
- **Fewer breakouts**

TARGET AUDIENCE

Internists, hospitalists, family practitioners, anesthesiologists, physician assistants, certified nurse anesthetists, nurse practitioners and allied health professionals engaged in management of the perioperative patient.

OBJECTIVES

As a result of participating in this activity, participants should be able to:

- Implement effective prophylactic strategies for venous thromboembolism (VTE)
- Recognize the importance of preventing VTE postoperatively
- Appraise the latest recommendations of the American College of Chest Physicians guidelines including those regarding extended prophylaxis
- Identify the emerging Oral Anticoagulants in VTE Prevention
- Evaluate the thrombotic risks in surgical patients on Warfarin and antiplatelet therapies and formulate anticoagulation strategies to reduce complications
- Utilize current guidelines and best practices to manage evidence-based Perioperative medical care of surgical patients
- Discuss the importance of cardiac risk assessment for non-cardiac surgery
- Compare the various cardiac risk indices and guidelines

- Examine the role of biomarkers for preoperative cardiac risk stratification prior to non-cardiac surgery
- Review the current state of evidence for Perioperative beta-blockers, statin therapy and emerging therapies for non-cardiac surgery
- Effectively implement therapies for perioperative risk reduction
- Outline the role of various imaging modalities in cardiac risk stratification for non-cardiac surgery
- Outline the principles of perioperative Warfarin and antiplatelet therapy management
- Recognize the options for perioperative bridging therapy including the risks and benefits of this strategy
- Evaluate special considerations when using conventional and new anticoagulants
- Outline the prevalence of post-operative pulmonary complications after non-cardiac surgery
- Outline perioperative strategies to decrease the frequency of Postoperative Pulmonary Complications

ACCREDITATION

The University of Miami Leonard M. Miller School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

CREDIT DESIGNATION

The University of Miami Leonard M. Miller School of Medicine designates this live activity for a maximum of **20.50 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

DISCLOSURE AND CONFLICT OF INTEREST RESOLUTION

All conflicts of interest of any individual(s) in a position to control the content of this CME activity will be identified and resolved prior to this educational activity being provided. Disclosure about provider and faculty relationships, or the lack thereof, will be provided to learners.

SERVICES FOR THE DISABLED

Please contact the Division of CME prior to February 3, 2012 should you have any special needs that may require additional assistance. A conference staff member will contact you to discuss these special requirements.

REGISTRATION CANCELLATION POLICY

Refunds will be made only if written notice of cancellation is received prior to February 15, 2012. A \$100 fee is charged for all refunds. After this date, no refunds will be made. In cases where a course is cancelled due to insufficient registrations, a full tuition refund will be made.

CALL FOR ABSTRACTS

For abstract guidelines and submission go to: <http://cme.med.miami.edu/x60.xml>. Abstracts are invited for presentation at the Perioperative Medicine Summit being held in conjunction with the Society for Perioperative Medicine and Quality Improvement (SPAQI).

DEADLINE

Abstract submissions must be received no later than **January 7, 2012**. Submitting authors will be notified of acceptance or rejection by **January 16, 2012**.

SUBMISSION CATEGORIES

We welcome abstracts in the following categories:

RESEARCH IN PERIOPERATIVE MEDICINE

Submissions can report clinical and/or laboratory-based research or consist of a systematic review of a clinical problem. Research abstracts concerned with efficiency, cost, or medical decision-making are also encouraged.

Two awards (hotel and registration) will be given to students and residents whose abstract is accepted to the meeting.

Visit www.cme.med.miami.edu for more detailed information and instruction.

INNOVATIONS IN PERIOPERATIVE MEDICINE

Authors who wish to describe an innovative program in perioperative medicine are encouraged to submit to this category. Innovations will primarily be descriptive, but they may also include preliminary data. A more rigorous evaluation of an innovative program should be submitted as a research abstract, rather than an innovation. For example, an innovation may describe a novel strategy for dissemination of practice guidelines, whereas a research abstract may analyze its impact on length of stay or post-operative morbidity or mortality.

PERIOPERATIVE CLINICAL VIGNETTES

A clinical vignette is a report of one or more cases that illustrates a new disease entity or prominent or unusual clinical feature of an established disease, highlights an area of clinical controversy in perioperative medicine, or illustrates a unique patient safety issue. It may include a summary of pertinent patient history, physical findings, laboratory data, or management description. It should be clear from the discussion of the abstract why the vignettes are appropriate for a perioperative medicine competition (versus general internal medicine, hospital medicine, or anesthesiology). Clinical vignettes will be judged on originality, organization, writing clarity, and relevance to perioperative medicine.
